Exercise 7

Show that if c is any nth root of unity other than unity itself, then

$$1 + c + c^2 + \dots + c^{n-1} = 0.$$

Suggestion: Use the first identity in Exercise 9, Sec. 8.

Solution

The first identity in Exercise 9 of Sec. 8 is

$$1 + z + z^{2} + \dots + z^{n} = \frac{1 - z^{n+1}}{1 - z}$$
 $(z \neq 1).$

Suppose that c is any nth root of unity other than unity itself.

$$c^n = 1, \quad (c \neq 1)$$

This root satisfies the previous identity.

$$1 + c + c^{2} + \dots + c^{n-1} + c^{n} = \frac{1 - c^{n+1}}{1 - c}$$

Subtract c^n from both sides.

$$1 + c + c^{2} + \dots + c^{n-1} = \frac{1 - c^{n+1}}{1 - c} - c^{n}$$

$$= \frac{1 - c^{n+1} - c^{n}(1 - c)}{1 - c}$$

$$= \frac{1 - c^{n+1} - c^{n} + c^{n+1}}{1 - c}$$

$$= \frac{1 - c^{n}}{1 - c}$$

$$= 0$$
