## Exercise 11

Use mathematical induction to show that when  $n = 2, 3, \ldots$ ,

(a) 
$$\overline{z_1 + z_2 + \dots + z_n} = \overline{z_1} + \overline{z_2} + \dots + \overline{z_n};$$
 (b)  $\overline{z_1 z_2 \dots z_n} = \overline{z_1} \overline{z_2} \dots \overline{z_n}.$ 

## Solution

## Part (a)

Start by showing that the result holds in the base case n=2.

$$\overline{z_1 + z_2} = \overline{z_1} + \overline{z_2}$$

This is property (2) in the text, which has been shown to be true. Now assume the inductive hypothesis,

$$\overline{z_1 + z_2 + \dots + z_k} = \overline{z_1} + \overline{z_2} + \dots + \overline{z_k},$$

and show that

$$\overline{z_1 + z_2 + \dots + z_k + z_{k+1}} = \overline{z_1} + \overline{z_2} + \dots + \overline{z_k} + \overline{z_{k+1}}.$$

Do so by grouping the first k terms, using the base case, and then using the inductive hypothesis.

$$\overline{z_1 + z_2 + \dots + z_k + z_{k+1}} = \overline{(z_1 + z_2 + \dots + z_k) + z_{k+1}}$$

$$= \overline{z_1 + z_2 + \dots + z_k} + \overline{z_{k+1}}$$

$$= \overline{z_1} + \overline{z_2} + \dots + \overline{z_k} + \overline{z_{k+1}}$$

Therefore, by mathematical induction,

$$\overline{z_1 + z_2 + \dots + z_n} = \overline{z_1} + \overline{z_2} + \dots + \overline{z_n}.$$

## Part (b)

Start by showing that the result holds in the base case n=2.

$$\overline{z_1}\overline{z_2} = \overline{z_1}\overline{z_2}$$

This is property (4) in the text, which has been shown to be true. Now assume the inductive hypothesis,

$$\overline{z_1 z_2 \cdots z_k} = \overline{z_1} \overline{z_2} \cdots \overline{z_k},$$

and show that

$$\overline{z_1 z_2 \cdots z_k z_{k+1}} = \overline{z_1} \overline{z_2} \cdots \overline{z_k} \overline{z_{k+1}}.$$

Do so by grouping the first k terms, using the base case, and then using the inductive hypothesis.

$$\overline{z_1 z_2 \cdots z_k z_{k+1}} = \overline{(z_1 z_2 \cdots z_k) z_{k+1}}$$

$$= \overline{z_1 z_2 \cdots z_k} \overline{z_{k+1}}$$

$$= \overline{z_1} \overline{z_2} \cdots \overline{z_k} \overline{z_{k+1}}$$

Therefore, by mathematical induction,

$$\overline{z_1 \, z_2 \, \cdots \, z_n} = \overline{z_1} \overline{z_2} \, \cdots \, \overline{z_n}.$$
