

## Exercise 27

Using the approximate conversion factors in Table 1.5, convert the following to SI units *without* using your calculator.

- a. 20 ft                          b. 60 mi  
c. 60 mph                        d. 8 in
- 

### Solution

The approximate conversion factors are in Table 1.5 on page 24.

a.  $20 \cancel{\text{ft}} \times \frac{1 \text{ m}}{3 \cancel{\text{ft}}} \approx 6.7 \text{ m}$

b.  $60 \cancel{\text{mi}} \times \frac{1 \text{ km}}{0.6 \cancel{\text{mi}}} \approx 100 \text{ km}$

c.  $60 \cancel{\text{mph}} \times \frac{1 \cancel{\text{m/s}}}{2 \cancel{\text{mph}}} \approx 30 \text{ m/s}$

d.  $8 \cancel{\text{in}} \times \frac{10 \text{ cm}}{4 \cancel{\text{in}}} \approx 20 \text{ cm}$
