

**Exercise 37**

For the following exercises, find functions  $f(x)$  and  $g(x)$  so the given function can be expressed as  $h(x) = f(g(x))$ .

$$h(x) = \sqrt[3]{x - 1}$$

---

**Solution**

Choose

$$f(x) = \sqrt[3]{x} \quad \text{and} \quad g(x) = x - 1.$$
