

Exercise 62

For the following exercises, use the function values for f and g shown in Table 3 to evaluate each expression.

x	$f(x)$	$g(x)$
0	7	9
1	6	5
2	5	6
3	8	2
4	4	1
5	0	8
6	2	7
7	1	3
8	9	4
9	3	0

Table 3

$$f(f(4))$$

Solution

Notice from the table that $f(4) = 4$ and $f(4) = 4$. Therefore,

$$f(f(4)) = f(4) = 4.$$
