

**Exercise 43**

Sets Find the indicated set if

$$A = \{1, 2, 3, 4, 5, 6, 7\} \quad B = \{2, 4, 6, 8\} \quad C = \{7, 8, 9, 10\}$$

(a)  $A \cup C$

(b)  $A \cap C$

---

**Solution**

The union of  $A$  and  $C$  ( $A \cup C$ ) is the combination of elements in both, whereas the intersection of  $A$  and  $C$  ( $A \cap C$ ) is only the elements they have in common.

$$A \cup C = \{1, 2, 3, 4, 5, 6, 7, 8, 9, 10\}$$

$$A \cap C = \{7\}$$
